

ASTROSHAMANIC HEALING

The Way Of Cancer

With Dave Mountjoy

Cancer is the Gateway to the Summer, the physical realm and Way of the South. The major theme of this Astroshamanic Healing event is twofold in nature: to express in its purest form the nurturing, warm and sensitive maternal energy of The Mother AND to place myself in a position to receive such nourishment and unconditional love.

Through the employment of shamanic techniques and practices rooted in experiential astrology, the intent is to delve deeply into the ancestral realm and recover clues regarding the original purpose of selecting the experience of a physical body. This event is primarily a search for my Original Intent, as seen from a collective perspective. With an expanded understanding of such information, I can begin to clarify what truly motivates me in this life.
